Proposed Term Sheet

MISS. PUBLIC SERVICE COMMISSION

This Term Sheet is being submitted by Public Utilities Staff ("Staff"), to Mississippi Power Company ("MPC" or the "Company") pursuant to Rule 13.103 of the Mississippi Public Service Commission's Rules of Practice and Procedure and Mississippi Rule of Evidence 408. While this term sheet does not represent a formal, binding offer of settlement, the below provisions represent an illustration of a possible settlement of all outstanding issues related to the Kemper Project. Parties reserve the right to revoke or modify, in whole or in part, this Term Sheet at any time until such term sheet is signed by the parties.

1. Kemper Gasifier Facility

The parties agree that MPCo will abandon the Kemper gasifier chemical plant and all related assets (the "gasifier"). The parties agree that none of the costs of the gasifier and related assets) will be paid by MPCo's ratepayers. For purposes of this agreement, gasifier related assets shall include the lignite mine, the CO_2 pipeline and all other assets not specifically required to operate the combined-cycle, gas turbine generation plant (CCGT). Furthermore, the parties agree that all current and future costs and risks associated with continued construction or operations, the cessation of operations, dismantlement, removal and environmental clean-up of the gasifier plant site as well as the mine and all other related assets and costs will not be borne by MPCo or its ratepayers. In accordance with this settlement, SoCo and MPCo will not seek cost recovery now or in the future for capital, fuel, operating, removal, dismantlement, environmental, financing, or any other costs related to the Kemper gasifier and related assets.

2. Kemper Revenue Requirement

The Parties agree that the Kemper Revenue Requirement will be recovered for the first three years of the settlement as a stand-alone revenue requirement subject to an annual filing in a dedicated KRF Rider. MPC may adjust the revenue requirement to the extent necessary to accommodate changes (up or down) to reasonable and customary operating expenses. Parties support the recovery of the following costs:

- a. Kemper CC and Related Facilities:
 - a. Kemper CC total allowed cost of \$814.5M including land cost of \$18.35M and AFUDC of \$122.34M plus 2018 plant additions of \$14.9M for a total allowed CCGT plant cost at 12/31/2018 of \$829.4 million.
 - b. Transmission \$114M
 - c. Accumulated depreciation of \$87.0 million average for the 2018 rate year.
 - d. ADIT related to plant of \$150.0 million at 12/31/2018 and average 2018 rate year plant ADIT of \$147.3 million and ADIT amounts for other rate base components as listed in the attached revenue requirement calculations
- b. Regulatory Assets (amounts at 12/31/2017):
 - a. Currently in rates remaining balance at December 31, 2017 of \$51.1M over a 5-year amortization period commencing on 1/1/2018. The previously approved regulatory assets have been adjusted to reflect actual unamortized balances.
 - b. Currently not in rates net New Regulatory Assets and Regulatory Liabilities of \$60.8M amortized over 5 years with amortization commencing on 1/1/2018; IM costs not

previously addressed of \$8.58 million are included with the New Regulatory Assets, with amortization over a 5-year period beginning on January 1, 2018. See paragraph 4, below, for description of certain Regulatory Liabilities.

- c. Capital Structure of 49.3% long-term debt; 0.7% preferred stock and 50% common equity
- d. Return on equity of 9.225% (no performance), cost of debt of 4.216%, and cost of preferred stock of 5.293%.
- e. WACC of 6.729%
- f. Kemper CC Annual O&M \$25.5M
- g. Ad Valorem Annual Taxes \$8.3M and Payroll Taxes of \$403k.
- h. IM costs after 12/31/2017. MPC's proposal to include an annual recurring amount of \$3.7M per year in 2018 O&M expense is rejected. IM costs are not anticipated to be recurring in 2018. IM costs may continue to be incurred during remaining months of 2017, until a Final Order is issued in this proceeding. MPC's actual verifiable IM costs will be deferred into a regulatory asset account for amortization over a reasonable period. As indicated in item 2(b) above, Staff has included \$8.58 million of IM costs (actual through May 2017 and estimated through December 2017) that were not previously considered in establishing MPC's revenue requirement with the New Regulatory Assets, and has applied a 3-year amortization to such IM costs. No other regulatory assets may be created without prior, specific Commission approval.

This results in a revenue requirement of \$122.055M.

In order to meet the Commission's request for parties to have "serious discussions that would lead to a rate reduction, with a particular focus on residential customers", the parties agree that amount reduction between the current \$126M revenue requirement and new revenue requirement of \$122.055M (\$3.9M) shall be allocated among the customer classes in the following manner: 50% residential, 25% commercial and 25% industrial.

3. Capacity Analysis and Mitigation Plan

- a. Parties agree that a Capacity Analysis and Mitigation Plan is the appropriate procedure and forum to examine and evaluate MPC's current generation reserve margin levels and plans for reducing the reserve margin closer to the long-term targeted levels.
- b. MPC commits to use the most current information available to develop and file a Reserve Margin Plan with the Commission which shall be subject to the following procedure:
 - i. Within six (6) months of Commission approval of this Stipulation, MPC shall, using the most current data available to MPC, develop, complete, and file with the Commission a Capacity Analysis and Mitigation Plan (in substantially similar form as the integrated resource plan included with the Company's certificate petition submitted in Docket No. 2009-UA-0014) as the vehicle to examine and evaluate the current reserve margin levels.
 - ii. MPC's filing shall also contain: (i) discreet alternatives that the Company proposes to address its current reserve margin; (ii) the timeframe over which each alternative can be implemented; (iii) a preliminary estimate of the costs of implementing each alternative, including any incremental transmission investment, any costs associated with retiring any undepreciated assets; and (iv) any other impacts (financial or otherwise) not specifically prescribed herein that

would have a material impact upon the service provided by MPC or the costs to retail customers.

- iii. MPC hereby stipulates and agrees to implement the alternative or alternatives approved by the Commission pursuant to a procedure and schedule to be determined by the Commission.
- c. MPC agrees to fund the costs of independent consultants to be hired by Staff to assist in this review.

4. Regulatory Liabilities for True-Up Calculations for Cost of Capital And Excess Amortization of Regulatory Assets

As provided in the Commission's Final Order in Docket No. 2015-UN-80, the Company will submit a trueup calculation of its cost of capital at the end of the test period May 31, 2016, May 31, 2017, and for the remaining period in 2017 during which the currently approved rates are in effect. The above-described revenue requirement includes an estimate of \$9.6 million for this as a Regulatory Liability through December 31, 2017, to be amortized over 5 years. For purposes of computing the true-up, the parties agree that under no circumstances will that amount of Regulatory Liability be reduced. Furthermore, the Company was previously authorized in Docket No. 2015-UN-80 to amortize certain regulatory assets over a two year period which ended on July 31, 2017. Since new rates will not become effective until January 1, 2018, the Company will recover excess amortization in the amount of \$17.5 million from August 1 to December 31, 2017, which will be accumulated in a Regulatory Liability and will also be amortized over a 5 year period.

5. Stakeholder Initiatives

1

MPC and Staff agree to discuss and develop certain customer assistance initiatives and economic development initiatives the parties agree would be in the public interest.

6. Prudence/Legal Findings

In consideration of the cost recovery concessions described above, the following stipulated items would be required for inclusion in the executed Stipulation:

- a. All costs included in retail rate base and rates are deemed prudently incurred, reasonable, and used and useful.
- b. The existing Kemper certificate amended to exclude the Gasifier and Gasifier related assets including the lignite mine, CO2 pipeline, etc., and to authorize NGCC operations.
- c. It is in the public interest to remove the Gasifier from retail rates.
